

## Prepare Your Pillow for Travel

I used to use narrow pieces of wood to do this, but the ribbon takes up much less room when not in use, & I don't worry about it snagging the threads.

Lay a ribbon across the threads near the pins & pin it down at each end. Bring the ribbon diagonally across the threads & pin at the corner, then lay the ribbon across the bobbins & pin. You can also wrap the ribbon around groups of bobbins & pin down the groups. Pin a worker cloth over the bobbins & put on the cover cloth.

Note: You may want to adjust this according to your pricking so as not to punch holes where they shouldn't be.
